## Invisalign<sup>®</sup> clear aligners can help all kinds of smiles.

Crowded

Not enough space for the teeth to fit.

Gapped
Excessive gaps
between the teeth.

Openbite
Upper and
lower teeth
do not overlap.

Underbite
Upper front
teeth behind the
lower teeth.

Crossbite
Some upper
teeth behind the
lower teeth.

Overbite
Upper front teeth overlap and hide the lower teeth.

General alignment
Some teeth have the potential to be straighter.

Baby and permanent teeth
Not enough space for permanent teeth to come in safely.

Talk to your doctor and find out if Invisalign treatment is right for you.
